DETAILED ACTION

1. The application filed 3/30/04 has been examined. Claims 1-18 are pending.
2. The drawings are objected to because they include company proprietary markings in the margins. Also the legend in block 15 of Fig. 1 is unintelligible because of the dark shading.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as “amended.” If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either “Replacement Sheet” or “New Sheet” pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

3. The disclosure is objected to because of the following informalities:
 - A. Applicant is requested to amend the specification on page 7, line 24 to clearly identify the acronyms used.
 - B. The labels for columns 1 and 2 shown in Table 1 do not line up with data.

Art Unit: 3661

- C. The detailed description does not discuss Fig. 3. It appears that reference should be made to this figure on page 7, lines 18+.
- 4. Claims 7-12 are objected to because of the following informalities:
 - A. As per claim 7, at line 1 "turbineengines" should be --turbine engines--.
 - B. All claims depending from an objected base claim are also objected to as containing the same deficiencies.
- 5. Claims 1-18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
 - A. As per claims 1, 7 and 13, the claims are indefinite because at line 1 they recite both a broad limitation ("turbine engines") followed by a narrower limitation ("such as those used in aircraft"). It is unclear whether the claims are intended to be limited to only aircraft turbine engines. Also "the actual values" (clm 1, line 7; clms 7, 13, line 6) and "the fault residuals" (clm 1, line 12; clms 7, 13, line 13) lack antecedence. Furthermore, the claims are unclear as to what is meant by the limitation "selecting the closest fault residual as a diagnosed fault". Closest relative to what?
 - B. All claims depending from a rejected base claim are also rejected as containing the same deficiencies.
- 6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited documents are of general interest.
